1. Product description

1.1 Purpose

The Miniware T-Stand is a small ceramic stand for safely resting a hot soldering iron while you work. It is designed for compact Miniware soldering irons such as the TS100 or TS80/TS80P and is also suitable for other irons of similar size and low weight. Thanks to its small size it fits into a tool bag, so you can take it with you even when repairing a drone at the flying field.

The soldering iron rests on a metal wire holder that can be folded down after use. Next to the holder there is a recess with a sponge for wiping the tip, and at the back of the stand a small compartment for small items such as leftover solder. The underside has a non-slip cork pad so that the stand does not slide on the table.

Stand with a soldering iron placed in it (soldering iron not included)

1.2 Specifications and package contents

Product designation	Miniware T-Stand
Material	ceramic (zirconium dioxide)
Dimensions	35 × 40 × 8.5 mm
Weight	26.7 g
Suitable soldering irons	Miniware TS100, TS80/TS80P and similarly sized lightweight irons
Packaging	transparent plastic box (PC), 50 × 50 × 20.5 mm
Package contents	1× stand with sponge
Not included	soldering iron, tips, solder

2. Use

2.1 Preparing the stand

① Place the stand on a flat, stable and non-flammable surface where you can easily reach it with the hand holding the soldering iron.

② Fold the metal holder up into its working position.

③ Moisten the sponge with clean water and squeeze it lightly. It should be damp, not wet – a dry sponge will be burnt by the hot tip, while a soaked one cools the tip unnecessarily.

2.2 Placing the soldering iron

Whenever you put the soldering iron down, place it in the holder of the stand – never lay it loose on the table. Insert the metal part of the iron into the wire holder so that the tip points upwards away from the table and the iron rests securely against the stand. The tip must not touch the table, cables or any other objects.

2.3 Cleaning the tip

Before soldering and regularly during work, wipe the hot tip with a short stroke across the damp sponge. This removes oxidised solder and flux residue. After wiping, lightly tin the tip again – a clean, tinned tip transfers heat better and lasts longer.

※ Do not wipe the tip on a dry sponge and do not stab it into the sponge. You may damage the sponge and contaminate the tip.

3. Safety and maintenance

3.1 Safety instructions

- The tip of the soldering iron is very hot. Do not touch it after placing the iron in the stand and do not leave a switched-on soldering iron unattended.
- The stand and the wire holder heat up from the soldering iron. Let them cool down after work before putting the stand away.
- Use the stand only on a non-flammable surface and away from flammable materials, cables and batteries.
- The stand is intended for lightweight irons. Do not place a heavy soldering iron in it – it could tip over.
- Ceramic is heat resistant but brittle. Protect the stand from drops and impacts; do not continue to use a cracked stand.
- The product is not a toy. Keep it out of the reach of children.

3.2 Cleaning and maintenance

- After work, remove the sponge, rinse it with clean water and let it dry.

- Replace a worn or burnt sponge with a new sponge of suitable size.
- Regularly empty leftover solder from the compartment and the recess.
- Clean the stand with a dry or slightly damp cloth only when it has cooled down completely.
- Fold the wire holder down for transport.

4. Information for the EU and Czech Market

4.1 Importer and responsible person in the EU

The product is placed on the European Union market by the importer stated below, who is at the same time the responsible person within the meaning of Article 16 of Regulation (EU) 2023/988 of the European Parliament and of the Council on general product safety (GPSR).

Importer / responsible person in the EU	Rotorama, s.r.o.
Company ID (IČO)	051 57 692
VAT ID (DIČ)	CZ05157692
Registered office	Okrajová 1351, 674 01 Třebíč, Czech Republic
E-mail	info@rotorama.cz
Phone	+420 252 252 098
Website	www.rotorama.com

4.2 Disposal

- The product contains no electronics or batteries and is not electrical equipment.
- At the end of its service life, dispose of it in accordance with the waste sorting rules at your place of residence: the metal wire holder as metal waste, the ceramic stand and the used sponge as mixed municipal waste or at a collection yard.
- Put the plastic packaging into the plastics container.

5. Warranty and rights arising from defective performance

The rights and obligations of the contracting parties are governed by Czech law, in particular by Act No. 89/2012 Coll., the Civil Code, and Act No. 634/1992 Coll., on consumer protection. The law of the country in which the product is used always prevails; the Czech regulations are given as the legal framework for purchases from Rotorama.

- The seller is liable to the buyer for the product being free of defects on receipt. If the buyer is a consumer, a defect may be notified **within two years of**

receipt of the product (Section 2165 of the Civil Code).

- If a defect appears within **one year** of receipt, the product is deemed to have been defective already at the time of receipt (Section 2161(5) of the Civil Code).
- When purchasing online, a consumer has the right to **withdraw from the contract within 14 days** of receiving the goods without giving a reason (Section 1829 of the Civil Code).
- Claims should be made with the retailer from whom you purchased the product. The importer's contact details are given in Chapter 4.1.
- The competent body for out-of-court settlement of consumer disputes is the **Czech Trade Inspection Authority**, Štěpánská 796/44, 110 00 Prague 1, www.coi.cz.
