1. Product description

1.1 Purpose

The XT60 splitter lets you power **two devices from a single battery or power source** fitted with an XT60 connector. It is particularly useful for powering small chargers such as the ToolkitRC M6 and similar.

Connect the **XT60 male** connector to the source (battery or power supply) and the powered devices to the two **XT60 female** connectors. Both branches are wired in parallel: both devices receive the same voltage as the source, and the currents drawn by both devices add up in the common section of the cable and in the male connector.

XT60 splitter – XT60 male connector on the left, two XT60 female connectors on the right

1.2 Specifications and package contents

Product designation	XT60 Rozdvojka - 1xM 2xF
Connectors	1× XT60 male, 2× XT60 female
Cable length	10 cm
Package contents	1× splitter
Not included	battery, power supply or powered devices (e.g. charger)

2. Use

2.1 Connection

- ① Before each use, check that the cable insulation and connectors are not damaged, melted or loose.
- ② Make sure that both powered devices are rated for the voltage of your source (battery). Both devices receive the same voltage.
- ③ First connect the powered devices to the **XT60 female** connectors.
- ④ Finally connect the **XT60 male** connector to the source. Push the connectors all the way in. An XT60 connector fits only one way – never use force and observe the correct polarity (red wire +, black wire –).
- ⑤ To disconnect, proceed in reverse order: disconnect the source first, then the devices. Always pull by the connector body, never by the cable.

✱ **Once the source is connected, both female connectors are live, even with nothing plugged in. Keep them away from metal objects.**

2.2 Safety instructions

- The splitter is intended for powering **two devices from one source**. Do not use it to connect two batteries or power sources to each other – if their voltages differ, large balancing currents would flow between them.
- The currents of both devices add up; the total must not exceed the capability of the source, cable or connectors. If the cable or connectors get noticeably warm, disconnect the source immediately.
- Never short-circuit the connector contacts. A short circuit of a Li-Po battery can cause burns, fire or damage to the battery.
- Do not use the splitter if the insulation is damaged or the contacts are loose or burnt.
- Never leave the setup unattended while charging or operating; place it on a non-flammable surface.
- Protect the splitter from moisture, water and high temperatures. Keep it out of the reach of children.
- Follow the manuals and safety instructions of the manufacturers of the connected devices and batteries. The regulations of the country in which you use the product always prevail.

2.3 Maintenance and storage

- After use, disconnect the splitter and store it in a dry place where the connectors and cables are not subject to mechanical stress.
- Keep the contacts clean and dry; discard the splitter if they are blackened, burnt or loose.

3. Information for the EU and Czech Market

3.1 Importer and responsible person in the EU

The product is placed on the European Union market by the importer stated below, who is at the same time the responsible person within the meaning of Article 16 of Regulation (EU) 2023/988 of the European Parliament and of the Council on general product safety (GPSR).

Importer / responsible person in the EU	Rotorama, s.r.o.
Company ID (IČO)	051 57 692
VAT ID (DIČ)	CZ05157692
Registered office	Okrajová 1351, 674 01 Třebíč, Czech Republic
E-mail	info@rotorاما.cz
Phone	+420 252 252 098
Website	www.rotorاما.com

3.2 Disposal

- The crossed-out wheeled bin symbol on the product, its packaging or in the documentation means that at the end of its service life the product **must not be disposed of together with mixed municipal waste**.
- Hand it over at a take-back point for electrical equipment – at a collection yard, at a take-back point of a collective system, or at the retailer when purchasing a new equivalent product. Take-back is free of charge for the end user.
- The obligations under Act No. 542/2020 Coll., on end-of-life products, are fulfilled by the importer through a collective take-back system.
- Proper disposal helps prevent negative impacts on the environment and human health and contributes to the reuse of secondary raw materials.

Through its contractual partner **ASEKOL a.s.**, the company ensures the take-back of waste electrical equipment from households and the separate collection of waste electrical equipment, batteries and accumulators in accordance with the applicable legislation. The customer is entitled to hand over old electrical equipment or a battery or accumulator at any collection point of the above contractual partner. The addresses of these take-back points are listed at www.asekol.cz, www.ecobat.cz and also <https://visoh2.mzp.cz/RegistrMistZO/RegistrMistZOPublic/MapaMistZpetOdberu>.

4. Warranty and rights arising from defective performance

The rights and obligations of the contracting parties are governed by Czech law, in particular by Act No. 89/2012 Coll., the Civil Code, and Act No. 634/1992 Coll., on consumer protection.

- The seller is liable to the buyer for the product being free of defects on receipt. If the buyer is a consumer, a defect may be notified **within two years of receipt** of the product (Section 2165 of the Civil Code).
- If a defect appears within **one year** of receipt, the product is deemed to have been defective already at the time of receipt (Section 2161(5) of the Civil Code).
- When purchasing online, a consumer has the right to **withdraw from the contract within 14 days** of receiving the goods without giving a reason (Section 1829 of the Civil Code).
- Claims should be made with the retailer from whom you purchased the product. The importer's contact details are given in Chapter 3.1.
- The competent body for out-of-court settlement of consumer disputes is the **Czech Trade Inspection Authority**, Štěpánská 796/44, 110 00 Prague 1, www.coi.cz.
